Subject: Fw: USA Today query about Metalico lead smelter site in Atlanta

Hi,

See the email below from GA EPD regarding a USA Today reporter seeking information about the Former Metalico-Evans site.

GA EPD conducted a Pre-CERCLIS Screening in the first quarter of 2010 under their PA/SI workplan for Site Evaluation. The PSA recommends Discovery and further evaluation based on potential targets and detections of metals at levels greater than 3X background using an XRF (X-ray fluorescence field screening).

It was my understanding that ERRB was to conduct a Removal Site Evaluation at the site as well. I recommended that EPD delay starting the Preliminary Assessment until the RSE was finished, but due to to EPD's already full workplan, we had also considered assigning an EPA contractor with the PA.

Jeff Crowley was the OSC assigned at the time. I am copying Tim Neal as well. He may know if the RSE was done or the site was re-assigned.

I expect to be in on Monday (12/27) and Tuesday (12/28) of next week. I would appreciate guidance regarding how to proceed in responding.

Thank you,

Donna K. Seadler
Remedial Project Manager
Superfund Site Evaluation Section
US EPA, Region 4
(404) 562 - 8870

Donna:

Could you please contact Alison Young at (703) 854-6466? She is a reporter with USA Today and is inquiring about the status of the Metalico Evans evaluation.
